Hospital Database — Entity Relationship Diagram

Tables, primary keys (PK), foreign keys (FK), and one-to-many relationships

HOSPITALS	
PK	hospital_id
	name
	address
	size
	type
	accreditation_status

DOCTORS	
PK	person_id
	name
	date_of_birth
	address
	role
FK	hospital_id

PATIENTS	
PK	person_id
	name
	date_of_birth
	address
	role
FK	doctor_id

PRESCRIPTIONS	
PK	prescription_id
FK	patient_id
FK	doctor_id
	medication
	prescription_date

Relationships (drawn using 1 → many / crow's-foot notation)

- HOSPITALS.hospital_id 1 ——————< many DOCTORS.hospital_id
- DOCTORS.person_id 1 ——————< many PATIENTS.doctor_id
- PATIENTS.person_id 1 ——————< many PRESCRIPTIONS.patient_id
- DOCTORS.person_id 1 ——————< many PRESCRIPTIONS.doctor_id

Note: The four relationship lines above specify how to connect the tables. This is an editable Word planning diagram.
